

Republic of Yemen
Ministry of Higher Education &
Scientific Research

Al-Razi University

Medical Sciences College
Department of Pharmacy
Program of Bachelor of Pharmacy

Program & Courses Specifications of Bachelor of PHARMACY

2012- 2017

A- Program Specifications

I- Programme Title: Bachelor of Pharmacy

Departments affiliated to college of Medical sciences

- Department of Pharmacy
- Department of Laboratory Medicine
- Department of Applied Medical sciences

II. Program Vision

The vision of Bachelor of pharmacy program is to achieve excellence in innovative pharmacy education, scholarly research, service to society and the profession, and thus improve the healthcare of the rural Appalachian community and is aspired to be the department of choice in Yemen and the region for learners and scholars.

III. Program Mission

The mission of Bachelor of pharmacy program is to provide a comprehensive and progressive education that prepares pharmacists to assume an active role in providing skilled, ethical, and compassionate patient care that improves the health and quality of life of residents in Yemen. The department achieves its mission by maintaining a community of active and creative scholars devoted to the discovery, integration and dissemination of knowledge in the clinical and pharmaceutical sciences.

IV. Program Aims

1. To provide excellent education and professional development of pharmacy students
2. To equip of pharmacy graduate students with fundamental knowledge and skills to enhance career opportunities within the pharmaceutical or biotechnology industries, academic pharmaceutical research, or pharmaceutical regulatory organizations.
3. To develop intellectual and professional skills of use to graduates irrespective of their career choice after graduation.
4. To conduct and promote applied research and problem-oriented basic research as a vital element of pharmaceutical sciences

5. To motivate scholar development in order to maintain high quality teaching and training skills for both undergraduates and postgraduates
6. To encourage extracurricular activities that enhances faculty image and pride.
7. To encourage and support the development of appropriate pharmacist models for various practice setting
8. To foster interdisciplinary aspects between faculty of pharmacy and community development needs

V. Program Learning Outcomes

After completion of this program the graduate will be able to:-

1. PROGRAM INTENDED LEARNING OUTCOMES (PILOS)

A. Knowledge and Understanding

PILOs	Teaching & Learning Methods	Assessment Methods
<p>a1. Explain the structural and functional units as well as the biological processes in human body and the factors influencing human health. يشرح الوحدات البنائية و الوظيفية و العمليات الحيوية في الجسم البشري و العوامل المؤثرة على صحة الإنسان</p> <p>a2. Describe the physicochemical properties & biological influences of matters (including chemicals, biochemical, drugs, dosage forms, products, poisons, etc.) used or encountered during practicing the pharmacy profession يوضح الخواص الفيزيائية و الكيميائية و التأثير البيولوجي للمواد (بما يشمل المواد الكيميائية و النباتية و الأدوية و المواد الكيميائية الحيوية و الأشكال الدوائية و المنتجات و السموم الخ) و المواد الأخرى ذات العلاقة بالعلوم الطبية و الصيدلانية.</p> <p>a3. Explain the scientific principles & concepts applied in various pharmacy practices. يشرح المبادئ و المفاهيم و النظريات العلمية المستخدمة في ممارسه الأعمال الصيدلانية</p>	<ul style="list-style-type: none"> ○ Lecture ○ Lecture-discussion (Tutorial) ○ Feed-back learning ○ Laboratory practice 	<ul style="list-style-type: none"> ○ Written exam ○ Attendance ○ Quizzes ○ Assignments ○ Practical activities assessment : <ul style="list-style-type: none"> ▪ Practical reporting ▪ Practical exam

a4. Describe the carrier missions, ethical responsibilities of pharmacists to patients and community while practicing various fields of pharmacy profession.

يصف المهام الوظيفية للصيدي و مسؤولياته الأخلاقية و المهنية تجاه المرضى و المجتمع في مختلف مجالات مهنة الصيدلة

- Lecture
- Lecture-discussion (Tutorial)
- Feed-back learning
- Laboratory practice

- Written exam
- Attendance
- Quizzes
- Assignments
- Practical activities assessment :
 - Practical reporting
 - Practical exam

B. Intellectual Skills

PILOs	Teaching & Learning Methods	Assessment Methods
<p>b1. Interpret accurately data of medical prescriptions and results of pharmacy-related experiments & tests.</p> <p>يفسر بدقة بيانات الوصفة الطبية و نتائج التجارب و الاختبارات الصيدلانية</p>	<ul style="list-style-type: none"> ○ Lecture-discussion (Tutorial) ○ Feed-back learning ○ Laboratory practice ○ Field-training ○ Group activities 	<ul style="list-style-type: none"> ○ Written exam ○ Assignments ○ Quizzes ○ Practical Part assessment : <ul style="list-style-type: none"> ▪ Practical reporting ▪ Practical exam ○ Field-training assessment <ul style="list-style-type: none"> ▪ Field Reporting ○ Graduation activities assessment <ul style="list-style-type: none"> ▪ Research discussion
<p>b2. Analyze efficiently drug information and other information various pharmacy- related information.</p> <p>يحلل بكفاءة المعلومات الدوائية و المعلومات الأخرى ذات العلاقة بمجالات العمل الصيدلاني</p>		
<p>b3. Integrate knowledge & skill to effectively perform missions of various pharmacy practices.</p> <p>يدمج المعرفة و المهارات لتنفيذ المهام المختلفة في مجالات العمل الصيدلاني</p>		
<p>b4. Evaluate different data and information encountered during practicing of pharmacy in order to make a critical judgment and proper selections.</p> <p>يقيم البيانات و المعلومات المختلفة و يتخذ على ضوء ذلك القرارات المناسبة</p>		

C. Professional and Practical Skills

PILOs	Teaching & Learning Methods	Assessment Methods
<p>c1. Operate and maintain the laboratory and manufacturing equipment and instruments and handle different materials safely and efficiently. يشغل ويحافظ على الأجهزة و المعدات الصيدلانية ويتعامل مع مختلف المواد المعملية بكفاءة و أمان</p>	<ul style="list-style-type: none"> ○ Laboratory practice ○ Group activities ○ Case study & Seminar ○ Graduation research project 	<ul style="list-style-type: none"> ○ Practical Part assessment ○ Field-training assessment ○ Assignments ○ Seminar assessment ○ Graduation research project assessment
<p>c2. Execute effectively the practical , industrial and research activities related to profession safely according to standard quality procedures. ينفذ الأنشطة الصيدلانية العملية و البحثية و التصنيعية بكفاءة و أمان تبعا للإجراءات المعيارية للجودة</p>	<ul style="list-style-type: none"> ○ Laboratory practice ○ Group activities ○ Case study & Seminar ○ Graduation research project 	<ul style="list-style-type: none"> ○ Practical Part assessment ○ Field-training assessment ○ Assignments ○ Seminar assessment ○ Graduation research project assessment
<p>c3. Perform the missions of marketing , administration and information providing as well as the patient-oriented missions effectively. يؤدي بكفاءة المهام الصيدلانية الإدارية و التسويقية وتقديم المعلومات الدوائية و مهام خدمة المرضى</p>	<ul style="list-style-type: none"> ○ Laboratory practice ○ Group activities ○ Case study & Seminar ○ Graduation research project 	<ul style="list-style-type: none"> ○ Practical Part assessment ○ Field-training assessment ○ Assignments ○ Seminar assessment ○ Graduation research project assessment
<p>c4. Efficiently apply language and medical terms and utilize library and electronic technologies to search for information , to present thoughts and report works. يطبق بفعالية قواعد اللغة و المصطلحات الطبية ويستخدم المكتبة و التقنيات الإلكترونية في عرض الأفكار و كتابة التقارير و البحث عن المعلومات</p>		

D. General & Transferable Skills

PILOS	Teaching & Learning Methods	Assessment Methods
<p>d1. Participate effectively in teamwork activities. يشارك بفاعلية في أنشطة الفريق الواحد</p> <p>d2. Demonstrate ethical conduct , discipline life respect and desire to serve community. يظهر الممارسة الأخلاقية و الانضباط و احترام الحياة والرغبة في خدمة المجتمع</p>	<ul style="list-style-type: none"> ○ Laboratory practice ○ Field training ○ Group activities ○ Case studies demonstrations ○ Graduation research project 	<ul style="list-style-type: none"> ○ Practical activities assessment <ul style="list-style-type: none"> ▪ Practical reporting ▪ Practical exam ▪ Lab. accomplishments ○ Field-training assessment <ul style="list-style-type: none"> ▪ Field attitude ▪ Field Reporting ▪ Field Tasks accomplishment ○ Assignments ○ Graduation Research project assessment <ul style="list-style-type: none"> ▪ Research attendance & attitude
<p>d3. Communicate efficiently with colleagues, supervisors, teachers, patients and members of healthcare team. يتواصل بفعالية مع زملائه و المشرفين عليه و المدرسين و المرضى و أعضاء الفريق الطبي</p> <p>d4. Demonstrate respect to laws , regulations and profession ethics and demonstrate the skills of time management, self-learning and problem solving ■ يظهر مهارات إدارة الوقت و التعلم الذاتي و حل المشكلات و يظهر احتراماً للقوانين و الأنظمة و أخلاقيات المهنة</p>	<ul style="list-style-type: none"> ○ Laboratory practice ○ Field training ○ Group activities ○ Case studies demonstrations ○ Graduation research project 	<ul style="list-style-type: none"> ○ Practical activities assessment <ul style="list-style-type: none"> ▪ Practical reporting ▪ Practical exam ▪ Lab. accomplishments ○ Field-training assessment <ul style="list-style-type: none"> ▪ Field attitude ▪ Field Reporting ▪ Field Tasks accomplishment ○ Assignments ○ Graduation Research project assessment <ul style="list-style-type: none"> ▪ Research attendance & attitude

VI. Program System

A. Programme duration	= 5 levels (5 years) (10 semesters)
B. The academic year	= 2 academic Semesters (32 weeks)
C. The academic Semester	= 16 weeks
D. Attendance	Obligatory for at least 75 % of lectures/practice sessions of each course
D. Programme structure :-	
Total number of courses	69
Total number of credit hours per 5 years	175 credit hours
No. of actual hours of training at Real-life fields	288 hours

VII. Study Plan

Level 1 / Semester I				
First Semester		Credit Hours		
No	Course	Theory	Practical	Total
1.	General Biology	2	1	3
2.	Mathematics	2	-	2
3.	Arabic language	2	-	2
4.	English language I	2	-	2
5.	Introduction of Computer	1	2	3
6.	Islamic culture	2	-	2
7.	General chemistry	2	1	3
Total Credit Hours		13	4	17

Level 1 / Semester II				
No	Course	Credit Hours		
		Theory	Practical	Total
1.	English language II	2	-	2
2.	Biostatistics	2	-	2
3.	Biophysics	2	1	3
4.	Psychology	2	-	2
5.	Organic chemistry	2	1	3
6.	Introduction to Pharmacy profession	2	-	2
7.	Physical Pharmacy	2	1	3
Total Credit Hours		14	3	17

Al-Razi University

Medical Sciences College
Department of Pharmacy
Program of Bachelor of Pharmacy

Level 2 / semester III

No	Course	Credit Hours		
		Theor	Practical	Total
1.	Pharmaceutics I	2	1	3
2.	Pharmaceutical Organic chemistry I	2	1	3
3.	Anatomy of Human body	2	1	3
4.	Physiology I	2	-	2
5.	Public health	2	-	2
6.	Pharmaceutical analytical chemistry I	2	1	3
7.	Pharmaceutical calculation skills	2	-	2
Total Credit Hours		14	4	18

Level 2 / Semester IV

No	Course	Credit Hours		
		Theory	Practical	Total
1.	Pharmaceutics II	2	1	3
2.	Physiology II	2	-	2
3.	Pharmaceutical analytical chemistry II	2	1	3
4.	Histology	1	1	2
5.	Pharmaceutical Organic chemistry II	2	1	3
6.	Botany	1	1	2
Total Credit Hours		10	5	15

Level 3 / Semester V

No	Course	Credit Hours		
		Theory	Practi	Total
1.	Pharmaceutics III	2	1	3
2.	General Pharmacognosy I	2	1	3
3.	Pharmaceutical Organic chemistry III	2	1	3
4.	Biochemistry	2	1	3
5.	Pathology	2	-	2
6.	Pharmaceutical analytical chemistry III	2	1	3
7.	Pharmaceutical Microbiology I	2	1	3
Total Credit Hours		14	6	20

Level 3/ Semester VI

No	Course	Credit Hours		
		Theory	Practical	Total
1.	Pharmaceutics IV	2	1	3
2.	Pharmacology I	2	1	3
3.	General Pharmacognosy II	2	1	3
4.	Pharmaceutical Biochemistry	2	1	3
5.	First aid	2	-	2
6.	Pharmaceutical Microbiology II	2	1	3
Total Credit Hours		12	4	17

Level 4 / Semester VII

No	Course	Credit Hours		
		Theory	Practical	Total
1.	Pharmacology II	2	-	2
2.	Phytochemistry I	2	1	3
3.	Toxicology	2	1	3
4.	Medicinal chemistry I	2	1	3
5.	Pathophysiology	2	-	2
6.	Biotechnology	2	-	2
7.	Biopharmaceutics & Pharmacokinetics I	2	-	2
Total Credit Hours		14	3	17

Level 4 / Semester VIII

No	Subject	Credit Hours		
		Theory	Practical	Total
1.	Clinical Chemistry	2	-	2
2.	Biopharmaceutics & pharmacokinetics II	2	-	2
3.	Pharmacology III	2	-	2
4.	Phytochemistry II	2	1	3
5.	Medicinal chemistry II	2	1	3
6.	Parasitology	2	1	3
Total credit hours		12	3	15

Level 5 / Semester IX

No	Course	Credit Hours		
		Theory	Practical	Total
1.	Applied Pharmacognosy I	2	1	3
2.	Clinical pharmacy I	2	-	2
3.	Quality control	2	1	3
4.	Industrial pharmacy I	2	-	2
5.	Pharmacology IV	2	-	2
6.	Research methodology	2	-	2
7.	Hospital pharmacy	2	-	2
8.	Medicinal chemistry III	2	1	3
Total Credit Hours		16	3	19

Level 5 / Semester X

No	Course	Credit Hours		
		Theory	Practical	Total
1.	Marketing	2	-	2
2.	Community pharmacy	2	-	2
3.	Medicinal Chemistry IV	2	1	3
4.	Applied Pharmacognosy II	2	1	3
5.	Clinical pharmacy II	2	-	2
6.	Industrial pharmacy II	2	-	2
7.	Professional Ethics & Regulation	2	-	2
8.	Graduation Research	-	4	4
Total Credit Hours		14	6	20

VIII. Programme Admission Requirements

The degree of Bachelor of Pharmaceutical Science will be recommended for students:-

1. Who have passed the secondary school (scientific department)
2. Who have fulfilled the requirements laid by Ministry of higher education and scientific research.
3. Have fulfilled the requirements laid by Al-Razi College for medical sciences.

IX. Assessment of students:

Assessment of the learning objectives will be carried out during as well as at the end of the course, through:

Course assessment

1- For courses involving only theoretical parts

- | | |
|---------------------------|-----|
| • Assignments and Quizzes | 20% |
| • Mid-term exam | 20% |
| • Final Exam | 60% |

.....
Total **100 %**

2- For courses involving both theoretical and practical parts

A. Theoretical part

- | | |
|------------------------|-----|
| • Assignments | 10% |
| • Mid-theory term exam | 10% |
| • Final theory Exam | 40% |

.....
Total **60 %**

B. Practical part

- | | |
|--|------|
| • Laboratory achievements (Experiments, reporting, etc.) | 10 % |
| • Attitude | 10% |
| • Final Practical Exam | 20% |

.....
Total **40 %**

Graduation Research assessment

Each graduation research will be assessed by a committee of three member as follows

Items	Weight
The supervisor	70 %
Internal examiner : a member of the department teaching stuff.	15 %
external examiner : a qualified external examiner (either from other departments of the college or from another university)	15 %
Total	100

Assessment of the project by the supervisor	
Items	Mark
Attendance	35
Attitude and collaboration	35
Total	70

Assessment by the internal/External examiner	
Items	Mark ¹
Research methodology	5
Research writing	5
Presentation	2
Discussion	3
Total	15

¹: The whole students team of the projects will be assessed as one unit

X. Grade classification:

Evaluation of successful students will be according to the following standards:

From 90% to 100% from total marks.	Excellent
From 80% to less than 90% from total marks.	Very Good
From 65% to less than 80% from total marks.	Good
From 50% to less than 65% from total marks.	Pass
Less than 50% from total marks.	Fail

XI. Regulations for Progression and Programme Completion

- For the students to be transferred from one academic year to the next, he is required to have successfully passed in all subjects in the final or in the complementary exams in October of the same year.
- However, the student may still be transferred if he has failed in not more than three subjects on of them elective. In such cases, students " carrying" subjects from one year to the next should re-sit for their "failed" subjects in their proper respective semesters.
- Final year students who have failed in October exam also, he has to re-sit for his exams in those subjects in their proper respective semesters thereafter as many times as necessary until he succeeds
- **First Year/Level/Semester 1:** Automatically moved to second Semester
- **First Year/Level/Semester 2:** Pass in all subjects or fail in not more than three subjects.
- **Second Year/Level/Semester 1:** Automatically moved to second semester
- **Second Year/Level/Semester 2:** Pass in all subjects or fail in not more than three subjects.
- **Third Year/Level/Semester 1:** Pass in all subjects or fail in not more than three subjects.
- **Third Year/Level/Semester 2:** Pass in all subjects or fail in not more than three subjects.
- **Fourth Year/Level/Semester 1:** Automatically moved to second Semester
- **Fourth Year/Level/Semester 2:** Pass in all subjects or fail in not more than three subjects.
- **Fifth Year/Level/Semester 1:** Automatically moved to second Semester
- **Fifth Year/Level/Semester 2:** Pass in all subjects

XII. Learning Media:

Learning aids are powerful communication tools for teaching. These are devices that can be presented in a visual and auditory format. Learning aids can be:

- Computer + Data show (for PowerPoint slides) or overhead projector
- Posters, and pictures
- Whiteboard or blackboard (plus chalk for blackboard or special whiteboard marker pens)

B- Course Syllabus

Course Title: GENERAL BIOLOGY

level	Semester	Credit hours		
		Theory	Practical	Total
1	1	2	1	3

Theoretical Aspect:

Order	Units/ Topics List	Learning Outcomes	Sub Topics List	No. of Weeks	contact hours
1	Scope of Biology	a1, a2, b2	<ul style="list-style-type: none"> Definitions and brief history of biology Living organisms and Non-Living things Chemical context of life Common features of Life process . Biological structures of living organisms: cell, tissue, organ, system. Energy sources in living organisms 	4	8
2	The cell : the basic unit of life	a3, a4, , b2	<ul style="list-style-type: none"> Structure and components of the cell: cell membranes : types, Functions and properties, cytoplasm, Micro and macro molecules of cell Function of enzymes & Chemical constituents of the protoplasm basic process in the cell (respiration, nutrition, etc.) life cycle of the cell differences between animal and plant cell. 	4	8
MID-TERM EXAM				1	2
3	animal kingdom	a1, b1	<ul style="list-style-type: none"> classification of living organisms into kingdoms, genera and species. Animal kingdoms classification : Genera and species; common features, diversity & reproduction. Examples of common species of general of animal kingdoms and their anatomical features. 	3	6
4	Inheritance	a6, b3	<ul style="list-style-type: none"> Mendel Experiments and the Gene Idea Molecular basis of inheritance : chromosome, DNA, genes 	3	6
FINAL - EXAM				1	2
TOTAL				16	32

Practical Part

No.	Tasks/ Experiments	Number of Weeks
1.	Introduction to biology lab: safety, tools, instruments, scope of experiments and reporting assignments.	1
2.	Structure & components of the cells: using illustrative models	1
3.	Light microscope: sample preparations, operation	2
4.	Differentiation between animal and plant cells.	1
5.	Common species of animal genera: morphological and microscopical features	4
6.	Molecular basis of hereditary using illustrative models.	1
7.	Mendel experimentation of hereditary	1

level	Semester	Credit hours		
		Theory	Practical	Total
4	VIII	2	1	3

IV. Course Content:

A – Theoretical Aspect:

Order	Units/ Topics List	PIOs	Sub Topics List	No. of Weeks	contact hours
1	Phenyl propane derivatives	a1, a2, a3, a4, b1, b2, b3, b4, b5	Introduction(definition, classification, biogenesis) Hydroxycinnamic acids (Definition, classification, biosynthesis, chemical structure, physic-chemical properties, extraction , pharmacological properties and uses Cinnamic aldehydes and monolignols (Definition, classification, biosynthesis, chemical structure, physic-chemical properties, extraction , pharmacological properties and uses Coumarins (Definition, classification, biosynthesis, chemical structure, physic-chemical properties, extraction , pharmacological properties and uses Stilbenoids (Definition, classification, biosynthesis, chemical structure, physic-chemical properties, extraction , pharmacological properties and uses	3	6
2	Volatile oils	a1, a2, a3, a4, b1, b2, b3, b4, b5	Definition, classification, distribution and occurrence; Extraction : distillation methods and solvent extraction ; Chemical , physical and pharmacological properties examples of crude drugs containing volatile oils	3	6
Midterm exam				1	2
3	Glycosides	a1, a2, a3, a4, b1, b2,	Introduction (definition, classification, distribution, extraction, isolation and pharmacological properties)	3	

		b3, b4, b5	<p>Cardioactive glycosides (cardinolides, bufadienolides, sugars, structure activity relationship, distribution, extraction, chemical and physical properties, hydrolysis of cardiac glycosides, biogenesis, pharmacological properties, mechanism of action, chemical tests. Chief drugs containing cardiac glycosides (Digitalis, strophanthus, Adonis, Convalaria and squill).</p> <p>Saponin glycosides (definition, classification, distribution, structures, biogenesis, chemical, physical properties, characterization, biological and pharmacological properties. Drugs as expectorant, antitussive, antiexudative, adaptogens and diuretic)</p> <p>Anthracen glycosides (classification, distribution, structures, biosynthesis, extraction, chemical, physical properties, characterization, pharmacological properties, Senna, Rhabarub and Aloe)</p> <p>Flavonoid glycosides (classification, biosynthesis, chemical structure, physico-chemical properties, rutin, hesperidin and flavonoid containing drugs)</p> <p>Cynogenic glycosides (cynogenesis, distribution, structures, biogenesis, detection, extraction, pharmacological activities and cynogenic drugs)</p> <p>Glucosinolates (Thioglycosides): definition, distribution, structures, biogenesis, hydrolysis, toxicity and drugs containing glucosinolates.</p>		6
4	Tannins	a1, a2, a3, a4, b1, b2, b3, b4, b5	definition, classification, structure, distribution, biosynthesis, physico-chemical properties, extraction, biological properties, examples of crude drugs containing tannins	1	2

Al-Razi University

Medical Sciences College
Department of Pharmacy
Program of Bachelor of Pharmacy

5	Steroids	a1, a2, a3, a4, b1, b2, b3, b4, b5	Definition, classification, structures , biogenesis, chemical and physical properties and characterization.	1	2
6	Miscellaneous e.g. bitter principles	a1, a2, a3, a4, b1, b2, b3, b4, b5	Definition, classification, structures , biogenesis, chemical and physical properties and characterization.	1	2
Course Review		a1, a2, a3, a4, b1, b2, b3, b4, b5	Review of the course topics by discussion session.	1	2

Course Title : Graduation Research

level	Semester	Credit hours		
		Theory	Practical	Total
5	X		4	4

Course Content:

- Each 2-4 students group is assigned to do a research (experimental or observational) directed by a supervisor of the department teaching staff or outside the faculty.
- The topic of research can be proposed by :
 - The supervisor
 - Or the students after supervisor acceptance
- The topic must be approved by the department/faculty administration.
- Experiments are carried out in the faculty laboratories and if necessary outside the faculty
- The department and the faculty provide the students with necessary instruments and materials
- The research is to be carried out within the period of the term (i.e. 16 weeks) and must be delivered to the department within that period
- The faculty propose the name of committee members to the faculty council . The committee will discuss and judge the research as described below in the assessment schedule .
